

KACIN Completes the Circuit for AMT

When Advanced Manufacturing Technologies, Inc. (AMT), a printed circuit board assembly designer and manufacturer in Westmoreland Industrial Park III, wanted to renovate its 12,500 square-foot building and add a 14,400 square-foot facility, it chose KACIN General Contractors.

Working with KACIN, AMT increased the size of its manufacturing floor, added a second level of administrative offices and consolidated its operations from four locations.

The new facilities put AMT in a strong position to strengthen its relationships with a worldwide customer base and allow co-owners Buck Helfferich and Tom Scanio to keep the company's 64 employees on a 4-day, 40-hour work week.

Besides integrating new and existing facilities seamlessly, equipping the plant with high-end conductive flooring, global humidity control and an employee lounge/meeting room with HD video and 7.1 surround sound, KACIN's transparent quoting made it easy for AMT to control costs as project specifications changed.

If you're thinking about renovations or new construction, let Jeff Ferris tell you how a KACIN building can power your success.
